

RECESSED

NO. 130

Enko's #130 extrusion is a **Beautiful and Strong** handle free solution made here in New Zealand. The robust construction of the #130 profile removes the need for a separate support rail, gives strength to the cabinet and creates manufacturing efficiencies. There is a #130 finish to suit any project, available in Powder coated Black or White, Anodised Silver or in DIY raw. The 42mm top rail and 52mm middle rail come in extra-long 3.6m lengths to minimize offcut wastage, and there are various brackets and end-caps for easy installation and a perfect finish.

FINISHES

Raw - Unfinished

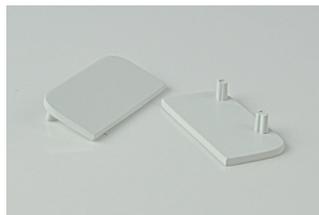

Appliance White - Powder Coated

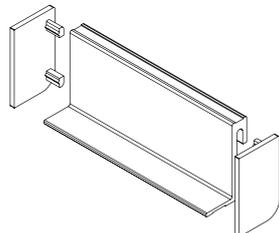

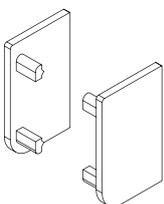

Satin Black - Powder Coated

Natural Silver - Anodised

End Caps - Supplied in pairs, these are fitted into the ends of the extrusion to provide a professional finish. They are coloured to match the extrusion finish.
