PLINTH PANEL INFO SHEET

Plinth Panel

Toe kicks have long been an integral part of good ergonomic kitchen design.
Traditional toe kicks have been costly and time consuming to manufacture and install.

Enko's coated PVC toe kicks are easy and inexpensive to prepare and install and allow an added dimension in creating special effects in kitchen design.

Mirror toe kick can make an island bench appear to "float" above the floor; brushed stainless or aluminium finished toe kick can be used to match appliances or other accessories and a paintable plinth provides total freedom in matching or contrasting other colours used in the kitchen.

- 13mm thick.
- Designed and manufactured in Italy.
- Moisture-proof with integral co-extruded gasket.
- Available in 5 finishes and 4 heights.
- Supplied in 4m lengths in packs of 8, 12 and 15 lengths.
- Can be scribed and trimmed.
- Innovative jointing options.
- Can be used with Enko cabinet legs and plinth clips.
