

STRIPLOX

WHAT IS STRIPLOX?

Striplox is a range of jointing and hanging products for use anywhere you want to join things together or hang things on the wall or ceiling.

- You can use Striplox in solid timber, MDF, composite panels, aluminium, balsa and many other substrates.
- Striplox is easy to install and can be customised to many different applications.
- Striplox is made from environmentally friendly, durable, heat stabilised glass reinforced nylon providing rigidity and strength.
- Striplox connectors can replace screws, brackets, connectors, latches, cams, dowels, mounting blocks.
- Striplox connectors can be surface mounts or rebated, vertical or horizontal, depending on your requirement.

Striplox Clip 50

Striplox 90D98

Striplox Mini 120

Striplox Pro 55

Striplox Pro 23

PREMIUM SERIES:					
Item Code	Item	Colour	Load Capacity		Use
SLPRO23	Striplox Pro 23	Black	95-160kg		Hidden mounting system for cabinets, floating shelves, bookcases, panels, artworks, mirrors, feature panels and many other applications
SLPRO55	Striplox Pro 55	Black	106-200kg		Same system as Pro 23, but larger with greater load capacity
SLCLIP50	Striplox Clip 50	Black	95-125kg		For smaller and more precise mounting
SLMINI60	Striplox Mini 60	Black	80-100kg		Invisible slide-to-lock jointer where you could normally use biscuits, cams or dowels. Mini 60 creates a neat tight joint in substrates 12mm thick and upwards
SLMINI120	Striplox Mini 120	Black	119-200kg		Same system as Mini 60, but larger to accommodate longer joints
SL90D98B	Striplox 90D98	Black	66-200kg		Right angle internal corner jointer. For mitre, butt, T, square, frame and flush joints
SL90D98W	Striplox 90D98	White	66-200kg		Right angle internal corner jointer. For mitre, butt, T, square, frame and flush joints
SL180DBK	Striplox 180D	Black	200-230kg		For joining larger panels such as benches, counter tops, desk returns etc. For substrates 12mm thick and upwards. The 180 degree is excellent for big jobs, spreading the load capacity evenly across your joint
SLMEGA241BK	Striplox Megalox	Black	150-295kg		This fully concealed, lockable solution is ideal for benches, countertops etc. Connect the two surfaces by inserting and sliding together into the locked position, requiring no use of clamps.
SLGRIP20BK	Striplox Griplox No 20 Biscuit	Black	N/A		Dimensions: L56mm, W4.25mm, H23mm. Replaces wooden biscuits which can swell in humid weather and cause substrate blowout. Barbs hold the biscuit in place and no glue is required
SLPRO23JIG	Striplox Pro 23 Jig	Red	N/A		Aids installation to save time during the fitment. Easily identifiable in red with hardened steel centre points in both components to mark all common substrates allowing for fast and efficient mounting of the Pro 23, Pro 55 and Clip 50
SLPRO55JIG	Striplox Pro 55 Jig	Red	N/A		
SLCLIP50JIG	Striplox Clip 50 Jig	Red	N/A		
SLROUTER	Striplox Cutters & Routers	N/A	N/A		Produces an accurate and reliable slot for the Mini range of assembly products. - Cut Diameter = 7mm - Shank Diameter = 1/4" - Height = 20mm Tungsten carbide cutting head
SLTEMPLATE	Striplox Mark Out Template	Clear	N/A		Speeds up the manufacturing processes by enabling the easy fitment of the Striplox range of joining solutions, featuring centre points, markings, slot guides etc.
SLGLUE	Striplox Liquidlox	Colourless Transparent	N/A		General purpose, middle viscosity, high strength fast cure adhesive which is compatible with all Striplox assembly products and a wide range of substrates. Ethyl cyanoacrylate adhesive, 50 - 80 C service temperature range, 15 second quick cure
