

# KARLO PULL-DOWN SYSTEM

'not just a simple pull-down unit'

## FEATURES

Karlo has a wholly redesigned central mechanism that allows for easier installation and has an effortless action. The Karlo unit has adjustable spring loading and the ergonomic lift motion follows the natural power of the shoulder.

7kg per shelf - 14kg overall + base shelf and with removable baskets for simple cleaning.

The central mechanism column keeps most of the base shelf available - maximising the storage area.

With Karlo, you will take advantage of the whole storage unit, even if it starts well out of reach!

Item Code	System Width	System Depth	System Height	Cabinet Width	Cabinet Depth
VBK60	508-588mm	279mm	598mm	600mm	300mm
VBK90	808-888mm	279mm	598mm	900mm	300mm
