What is Striplox?

Striplox is a range of jointing and hanging products for use anywhere you want to join things together or hang things on the wall or ceiling.

- You can use Striplox in solid timber, MDF, composite panels, aluminium, balsa and many other substrates.
- Striplox is easy to install and can be customised to many different applications.
- Striplox is made from environmentally friendly, durable, heat stabilised glass reinforced nylon providing rigidity and strength.
- Striplox connectors can replace screws, brackets, connectors, latches, cams, dowels, mounting blocks – it is limited only by your imagination.
- Striplox connectors can be surface mounted or rebated, vertical or horizontal, depending on your requirement.

Benefits of Striplox:

- No visible fixings.
- Production design savings.
- Eliminates damage – panels etc can be installed on site during the final build.
- Allows for flat pack transportation (lower transport costs) and on-site assembly.
- Quick and easy assembly.
- Reduced assembly labour costs.
- Designed under System 32 parameters.
- Strong, versatile, durable.
- Jointing will not interfere with substrate finish i.e. veneers, paint.
- No specialist tools or trade skills required for assembly.
- Cabinetry and panels can be fitted permanently or removed and reused easily.
- Striplox connectors can be configured in many different ways to suit your application, surface mount or rebate mount and oriented for vertical or horizontal assembly.
- Variety of mounting options, with glue or screw fix.

Striplox Pro 23

Hidden mounting system for cabinets, floating shelves, bookcases, panels, artworks, mirrors, feature panels and many other applications.

Striplox Pro 55

Same system as Pro 23, but larger with greater load capacity.

Striplox Clip 50

For smaller and more precise mounting.

Striplox Mini 60

Invisible slide-to-lock jointer where you would normally use biscuits, cams or dowels. Mini 60 creates a neat tight join in substrates 12mm thick and upwards.

Striplox Mini 120

Same system as Mini 60, but larger to accommodate longer joins.

Striplox 90D98

Right angle internal corner jointer. For mitre, butt, T, square, frame and flush joints.
